1. COMPANY VISION & DIRECTION

Company Overview

Trueform Digital is a professional digital solutions company focused on helping businesses establish a strong online presence. Our goal is to create modern, attractive, responsive, and user-friendly websites that help businesses present their products and services professionally online.

Our Vision

Our vision is to build a trusted digital solutions company that helps businesses grow through technology, creativity, and innovation. We want to provide professional website development services while building long-term relationships with our customers.

Our Brand Identity

Trueform Digital represents professionalism, modern design, reliability, and technology. Every website we create should reflect quality, clarity, and attention to detail. Our tagline is **“Design that works, results that last.”**

---

2. OUR CURRENT & FUTURE SERVICES

Current Service: Website Development

At the initial stage, our main focus will be website development. We will create websites for businesses, startups, and individuals according to their requirements. Our services may include responsive website design, custom UI, basic SEO, website prototypes, and CMS integration depending on the selected package and project scope.

Future Services

As our company grows, we plan to expand into video editing, AI chatbots, and automation services. These services will be introduced gradually after we establish a strong foundation in website development. For now, our priority is to deliver quality websites, build our portfolio, and attract customers.

---

3. STARTER WEBSITE PLAN — INDIA

Price Range: ₹13,000–₹20,000

The Starter Plan is designed for small businesses, startups, and individuals who need a simple and professional online presence. This package includes a website with one to three pages, designed to present essential business information, services, and contact details.

This plan is suitable for customers who want to introduce their business online without requiring advanced functionality. Any additional features outside the agreed scope should be discussed and priced separately.

---

4. BUSINESS WEBSITE PLAN — INDIA

Price Range: ₹30,000–₹40,000

The Business Plan is designed for growing businesses that need a more complete website. It includes four to seven pages, responsive design for mobile phones and desktop devices, and basic SEO setup.

This package is suitable for businesses that want to present their services in greater detail and provide visitors with a more organized browsing experience. The final price will depend on the exact requirements, content, and features agreed upon with the customer.

---

5. PROFESSIONAL WEBSITE PLAN — INDIA

Price Range: ₹40,000–₹70,000

The Professional Plan is intended for businesses that require a more customized website. It may include custom user interface design, animations, and CMS integration depending on the project's scope and requirements.

This package allows us to develop a more distinctive online presence tailored to the customer's brand and objectives. Before confirming the price, we must understand the required functionality, design complexity, and technical requirements. Any additional features must be included in the written proposal.

---

6. INTERNATIONAL WEBSITE PRICING

For customers outside India, Trueform Digital will use the following pricing ranges: the Starter Plan costs $350–400, the Business Plan costs $450–600, and the Professional Plan costs $700–1,000.

The Starter Plan is intended for customers who need a basic website, while the Business Plan offers additional pages, responsive design, and basic SEO. The Professional Plan is intended for projects requiring custom UI, animations, or CMS integration depending on scope.

These prices are starting guidelines for discussions with international customers. Before confirming any project, we must understand the customer's requirements, confirm the deliverables, and provide a clear final quotation.

---

7. WEBSITE MAINTENANCE PLANS

Indian Customers: ₹2,000–₹5,000 per month

International Customers: $50–100 per month

Website maintenance is an optional recurring service for customers who need support after their websites are delivered. Depending on the selected maintenance arrangement, it may include minor content updates, basic technical checks, small changes, and general website support.

Before accepting a maintenance agreement, we must clearly explain what is included, how much support is provided, and which tasks may involve additional charges. Maintenance fees are separate from the original website development price.

---

8. INTERNAL PRICING & NEGOTIATION POLICY

Maximum Starter Plan Discount: ₹2,000

Our pricing policy is designed to keep negotiations consistent and protect the value of our work. When discussing the Starter Plan with a customer, we may negotiate the price if there is a reasonable business need. However, the discount must never exceed ₹2,000 from the applicable quoted price.

For example, if the original quotation is ₹15,000, the maximum discount is ₹2,000, meaning the lowest permitted price under this rule is ₹13,000. If the original quotation is ₹20,000, the lowest permitted price is ₹18,000.

We should not immediately offer a discount when a customer asks for a lower price. First, we should understand the customer's budget and requirements, explain the value of our service, and consider whether the scope can be simplified.

This specific negotiation rule applies to the Starter Plan. Discounts on the Business and Professional Plans should not be offered without internal approval. Every final quotation must clearly state the agreed price and project scope.

---

9. PROJECT WORKFLOW & DELIVERY TIMELINE

Step 1: Understand Customer Requirements

Before starting any project, we must understand the customer's business, target audience, required pages, desired features, design preferences, budget, and expected deadline. This helps us select the right package and avoid misunderstandings.

Step 2: Prepare the Proposal

After understanding the requirements, we should prepare a proposal that explains the selected package, features, price, delivery timeline, payment terms, and any exclusions. The customer should approve the proposal before development begins.

Step 3: Prototype Development

Our target is to prepare an initial website prototype within approximately two days after receiving the necessary information and materials. The prototype allows the customer to review the proposed design and provide feedback.

Step 4: Website Development

Once the design direction and requirements are approved, we begin building the complete website. We must ensure that the website follows the agreed design, works correctly, and adapts to different screen sizes.

Step 5: Testing & Final Delivery

After development, we review the website, check its functionality, test responsiveness, and complete the agreed revisions. The target delivery time for the full website is approximately five to six days, depending on project complexity, customer feedback, and the availability of required materials.

These timelines are targets rather than unconditional guarantees. If a project requires additional features or changes, we must communicate any timeline adjustments to the customer.

---

10. PAYMENT TERMS & FINANCIAL RULES

Standard Payment Structure: 50% Upfront and 50% on Delivery

Our standard payment policy requires the customer to pay 50% of the agreed project price upfront before development begins. The remaining 50% is payable upon completion according to the agreed delivery and handover terms.

For example, if a website costs ₹20,000, the customer pays ₹10,000 upfront and the remaining ₹10,000 at the agreed final payment stage.

All prices, additional charges, and payment expectations must be confirmed in writing. Any work outside the agreed project scope should be discussed and approved before additional work begins.

---

11. DOMAIN & HOSTING POLICY

Trueform Digital will help customers manage domain registration and hosting setup. We will guide them in selecting suitable services and assist with the configuration required to make their websites accessible online.

Domain registration and hosting expenses are separate from our website development service fee. The customer will pay these third-party costs directly, while Trueform Digital provides the agreed setup assistance.

Whenever possible, the domain and hosting accounts should remain under the customer's ownership and control. We must explain renewal costs and other recurring expenses clearly before the customer commits to a service.

---

12. TEAM RESPONSIBILITIES

Founder — Manan Sharma

The founder will oversee business direction, customer communication, pricing decisions, project coordination, quality control, and overall company development. The founder will also help maintain the company's professional identity and manage business promotion.

Design Responsibilities

The design team will work on website layouts, UI design, color schemes, typography, visual consistency, and prototypes. Their goal is to ensure that every website looks professional and represents the customer's brand effectively.

Development Responsibilities

The development team will handle website implementation, functionality, responsive behavior, technical integration, testing, and bug fixing. They must ensure that the delivered website meets the approved requirements.

Marketing & Business Development

The team responsible for marketing will help promote Trueform Digital, identify potential customers, showcase completed work, and maintain a professional brand image. Team members should coordinate regularly so that customer communication and project delivery remain consistent.

Responsibilities may be adjusted according to team size, experience, and project requirements.

---

13. MARKETING & BUSINESS GROWTH

During the initial stage, our marketing efforts should focus on building credibility and attracting website development customers. We should create a professional company website, maintain active social media profiles, and showcase our work through portfolio projects and demonstrations.

We should also contact relevant businesses professionally, explain how our services can meet their needs, and maintain a record of customer enquiries. After completing projects successfully, we can request feedback and testimonials with the customer's permission.

As the company develops a stronger portfolio and customer base, we can gradually introduce video editing, AI chatbots, and automation services. Our growth strategy should focus on service quality, customer trust, and consistent improvement.

---

14. CUSTOMER COMMUNICATION & PROFESSIONAL BEHAVIOUR

Every team member should communicate with customers politely, clearly, and professionally. Before discussing prices, we should understand the customer's needs and explain the most suitable package without making unrealistic promises.

We must clearly explain what is included in each package, what costs extra, how long delivery may take, and how payments will be handled. Important decisions, quotations, changes, and approvals should be documented in writing.

If a customer requests additional features, we should evaluate the extra work, communicate any additional costs, and obtain approval before proceeding. We should never promise functionality or deadlines that the team cannot reasonably deliver.

---

15. IMPORTANT INTERNAL GUIDELINES

All team members should follow the company's agreed pricing policy, project workflow, and communication standards. We should maintain transparency with customers, respect deadlines, protect customer information, and take responsibility for our assigned work.

We should avoid accepting projects without understanding their requirements, promising unrealistic delivery dates, or making unapproved pricing changes. Every project should have a clear scope, assigned responsibilities, agreed payment terms, and a defined delivery process.

Our main objective is to build a reliable business reputation by delivering quality websites and maintaining strong customer relationships.

17. QUICK CUSTOMER CONVERSATION GUIDE

Introduction

Hello! My name is Manan Sharma, and I'm the founder of Trueform Digital. We help businesses establish a professional online presence through modern, responsive, and user-friendly websites.

Understanding Requirements

Before recommending a package, I would like to understand your business, the purpose of your website, the pages and features you need, and your expected timeline.

Explaining Our Packages

We offer Starter, Business, and Professional website development packages. Each package is designed for different requirements and budgets. Once I understand your needs, I can recommend a suitable option and provide a clear quotation.

Explaining the Timeline and Payment

We aim to share an initial prototype within approximately two days, with complete website delivery typically taking five to six days depending on the project scope. Our standard payment structure is 50% upfront and 50% upon completion, according to the agreed terms.

Closing the Conversation

Once we finalize your requirements, we will prepare a proposal outlining the website features, price, timeline, and payment terms. Thank you for considering Trueform Digital. We look forward to helping your business build a strong online presence.

FINAL NOTE FOR THE TEAM

Trueform Digital's current priority is website development. Every team member should focus on quality, professional communication, clear project scope, responsible pricing, and timely delivery.

Our goal is to build a strong portfolio, establish customer trust, and grow the business gradually. Future services such as video editing, AI chatbots, and automation can be introduced when the company is ready.

TRUEFORM DIGITAL
Design that works, results that last.
